## Main Group Drivers behind Key Figures

## Q3 2011

- Moderate growth of group revenue excluding currency effects
- This growth was driven by Agfa Graphics' inkjet, Agfa HealthCare's CR/DR and film for new applications of Specialty Products, partially counterbalanced by the volume decline in traditional film and by the weak economic climate
- The situation on the raw material markets has a very sharp impact on the Group's profitability. The effect of the film price increases was counterbalanced by product mix changes, volume effects and related manufacturing inefficiencies
- \% SG\&A expenses decreased versus last year

## Graphics: Main Drivers behind Key Figures

## Q3 2011

- Agfa Graphics started to feel the effects of the uncertain economic climate
- Accelerated market-driven decline in analogue computer-to-film
- Continued volume increase in digital computer-to-plate
- Another quarter of growth in industrial inkjet
- Despite ongoing price increases, gross margin decreased because of the high raw material costs, competitive pressure and less manufacturing efficiency

## HealthCare: Main Drivers behind Key Figures

## Q3 2011

- Excluding currency effects, revenue decreased by $4,6 \%$.
- In the Imaging segment, the growth for CR/DR was counterbalanced by the decline for the traditional X-ray film products
- The Imaging IT segment was influenced by the uncertain economic conditions, as certain governments scaled down their healthcare budgets and hospitals are postponing their planned investments
- Despite continuous film price increases, gross margin decreased because of the high silver price, less manufacturing efficiency and product mix
