Agfa strategy and competitive positioning

Philippe Houssiau

President HealthCare Business Group

February 2nd, 2005

Today's presentation

- **Market drivers**
- **Market opportunity**
- **Combined strengths**
- **Integration approach**
- **GWI model, Orbis® overview, synergies with Agfa**
- **Ludwigsburg case study**
 - **Introduction to needs and benefits of hospital-wide IT**
 - **Hospital tour and demos**

Current drivers

Societal and medical trends

- **INCREASED LIFE EXPECTANCY and LOWER BIRTH RATE**
 - Increased demand for Healthcare services
- **MORE CHRONIC DISEASES**
 - Increased need for screening
- **MEDICO-LEGAL REQUIREMENTS**
 - Need to avoid errors and failures
- **MOVE TO OUTPATIENT CARE and MINIMAL INVASIVE TREATMENTS**

- **Staff shortage & salary issues**
- **Non optimal operating process**
- **Labor and administrative intensive**
- **Limited patient care time**
- **Disparate information components**
- **Unconnected & non-transparent**
- **Systematic medical error risk**

Today's medical environment

- **WAGE COST and STAFF SHORTAGE**
 - Need to control costs and enhance efficiency
- **COMPLEXITY OF THE MEDICAL PRACTICE**
 - Increased communication between healthcare professionals
 - Management and deployment of more sophisticated medical equipment
- **REGULATION FORCES IT ADOPTION**

Agfa HealthCare strategy

Radiology solutions

- ➔ **Grow with radiology**
 - Provide imaging information systems and services

Departmental solutions

- ➔ **Develop presence in clinical departments**
 - Provide image management and information systems and services

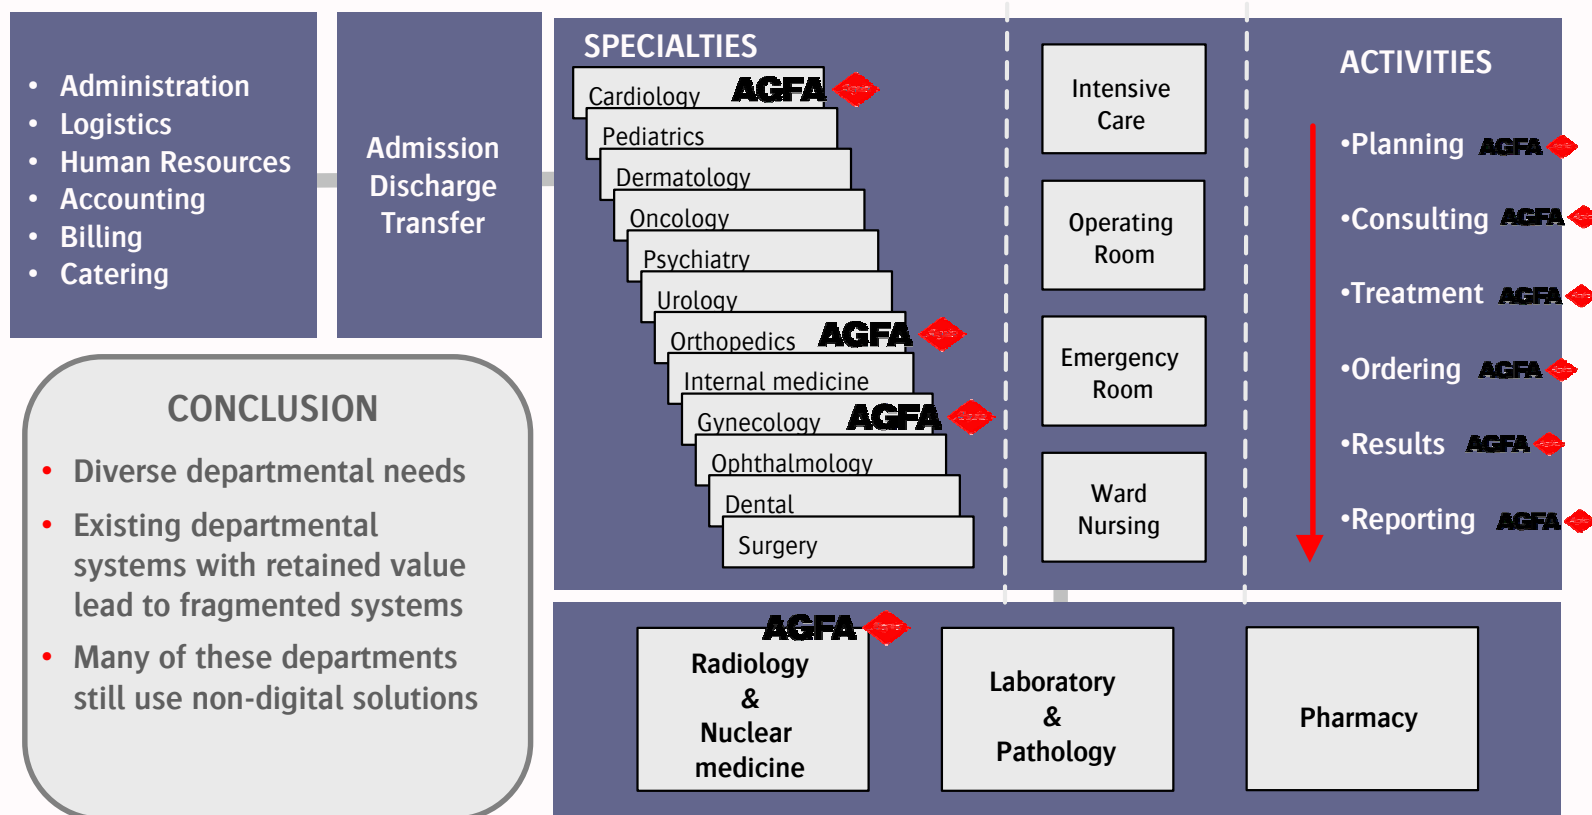

Healthcare IT solutions

- ➔ **Grow mainly by acquisition**
 - Provide community wide systems and services, Hospital Information System and Electronic Patient Record (HIS, EPR)

Imaging Technologies

- ➔ **Leverage Intellectual property and expertise**
- ➔ **Innovate through ventures and partnerships**
 - Provide leading edge healthcare Imaging technologies and computer aided detection tools

Disparate hospital information components

Agfa in healthcare today

Europe Healthcare IT market revenue forecast, 2004-2009

Including HW, software, services, consultancy...

Source : F&S, 2004 / COCIR / Agfa team

Europe: market observations

Europe is at different stages in rolling out EPR

- **Germany**

- Highest level of installations
- High IT spend and steady growth
- Many mid-sized national players
- GWI + Boss has the largest customer base

- **France**

- Lowest IT budget levels, average growth
- Preference for established suppliers
- Symphonie On Line, Medasys, and public “companies” have the largest Customer base

- **Italy**

- Relatively high IT budgets, highest rate of growth
- Fragmented market with many small national players

- **Netherlands**

- Government push of EPR programs

- **Belgium**

- Agfa’s stronghold – Medar winning in EPR...

- **Spain**

- Low IT spend with high growth expectations
- Few global players but preference for hardware vendors

- **UK**

- Short term impact of National Programme – but Frozen market
- Big increase in IT budget levels
- High level of standalone systems

How we compete

- Disruptive IT model, disruptive technology
- Innovation
- Install-base leverage
- Neutral integrator
- Competitive edge through clinical depth

Agfa and GWI: a powerful combination

GW I

- Connectivity & integration to **hospital & public information systems**
- Domain know-how in **administrative and clinical hospital IT – horizontal** 'holistic' approach
- Strong **methodology in project IT business**
- Software architecture built for future vision
- Germany, Austria, Switzerland – key contacts at enterprise level

AGFA HealthCare

- Connectivity & integration to diagnostic modalities and information systems
- Domain know-how in **key hospital departments** and imaging centers – **vertical** approach
- **Strength** of a large **corporate organization**
- Worldwide sales & services organization
- Worldwide customer base – market share

Agfa and GWI - Complementing each other

Luc Thijs

Head of Radiology & Departmental Solutions

February 2nd, 2005

The HealthCare Enterprise, a complex organization

Most hospital structures are highly fragmented, with highly specialized staff performing tasks within their department.

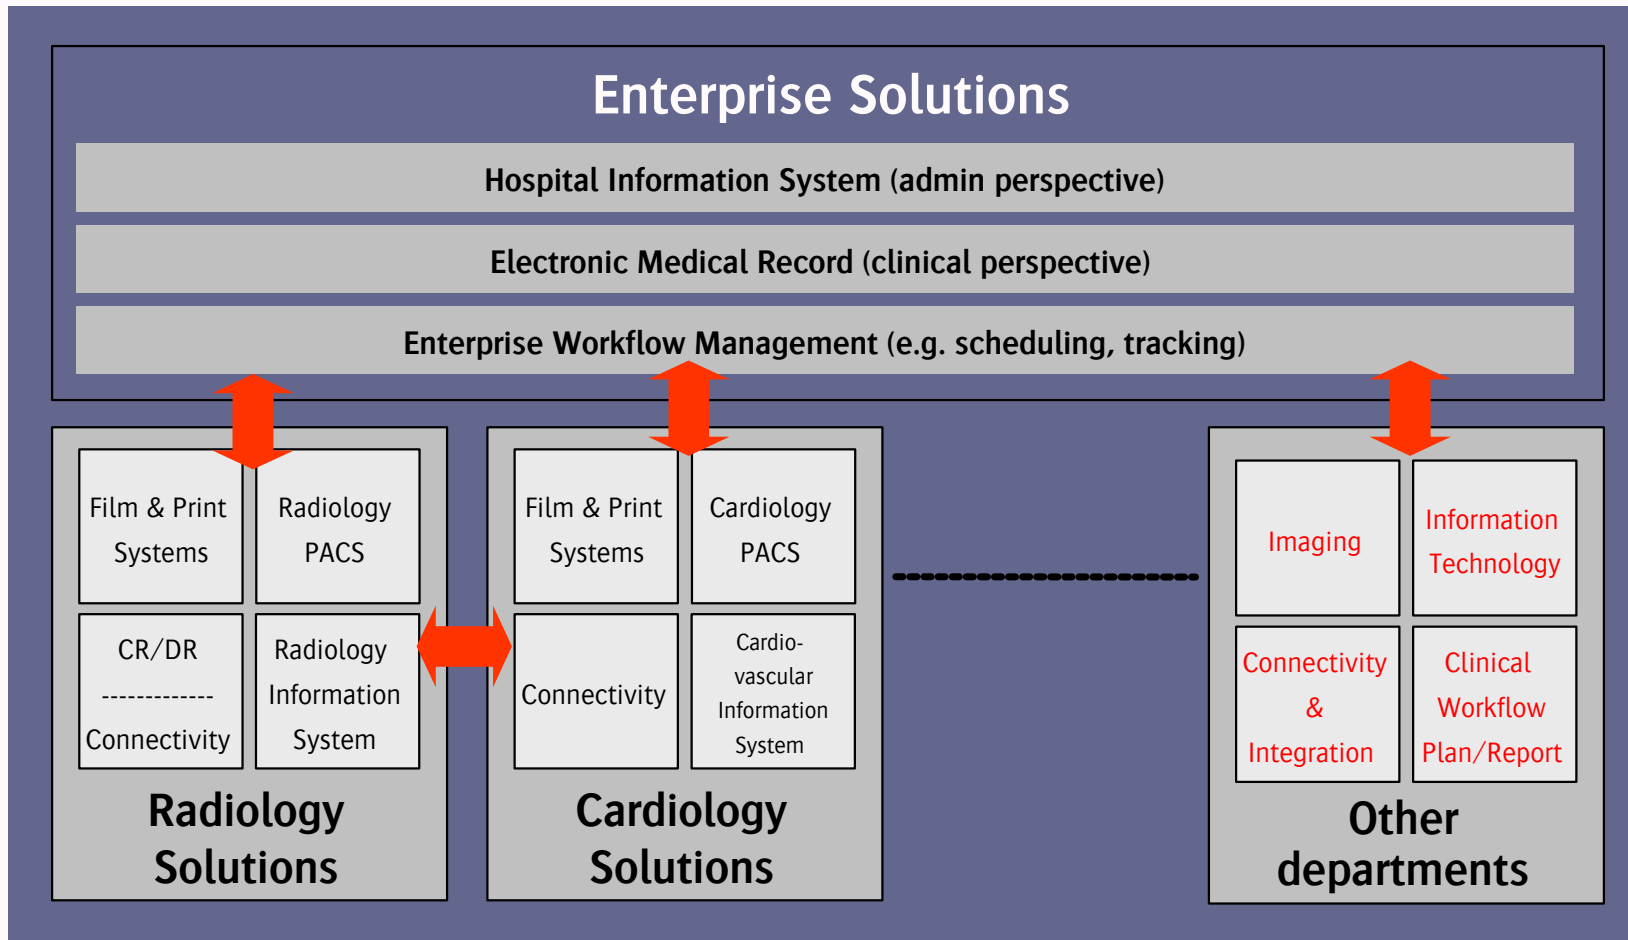

Two market realities co-exist today

- Enlightened CEO/CFO/CIO/BoM of a hospital
- Achieve quality of care and increased control of outcomes at enterprise level > Integration of the 'departments' into one coherent interoperable environment
- Top-down decision from enterprise management
- Commitment to projects with a 3 to 7 year span, affecting entire organization
- Focus on 'best common platform across the enterprise'

- Inspired head of a department or a discipline
- Achieve quality of care and increased control of outcomes within discipline or department
- Mostly bottom-up initiatives from the department head
- Commitment to projects with a 1 to 2 year span, affecting a subset of the organization
- Focus on a 'best-in-class' platform with comprehensive functionality for a department or a discipline

Urging for two complementary approaches

But one well-integrated portfolio

The strengths of Agfa and GWI combined

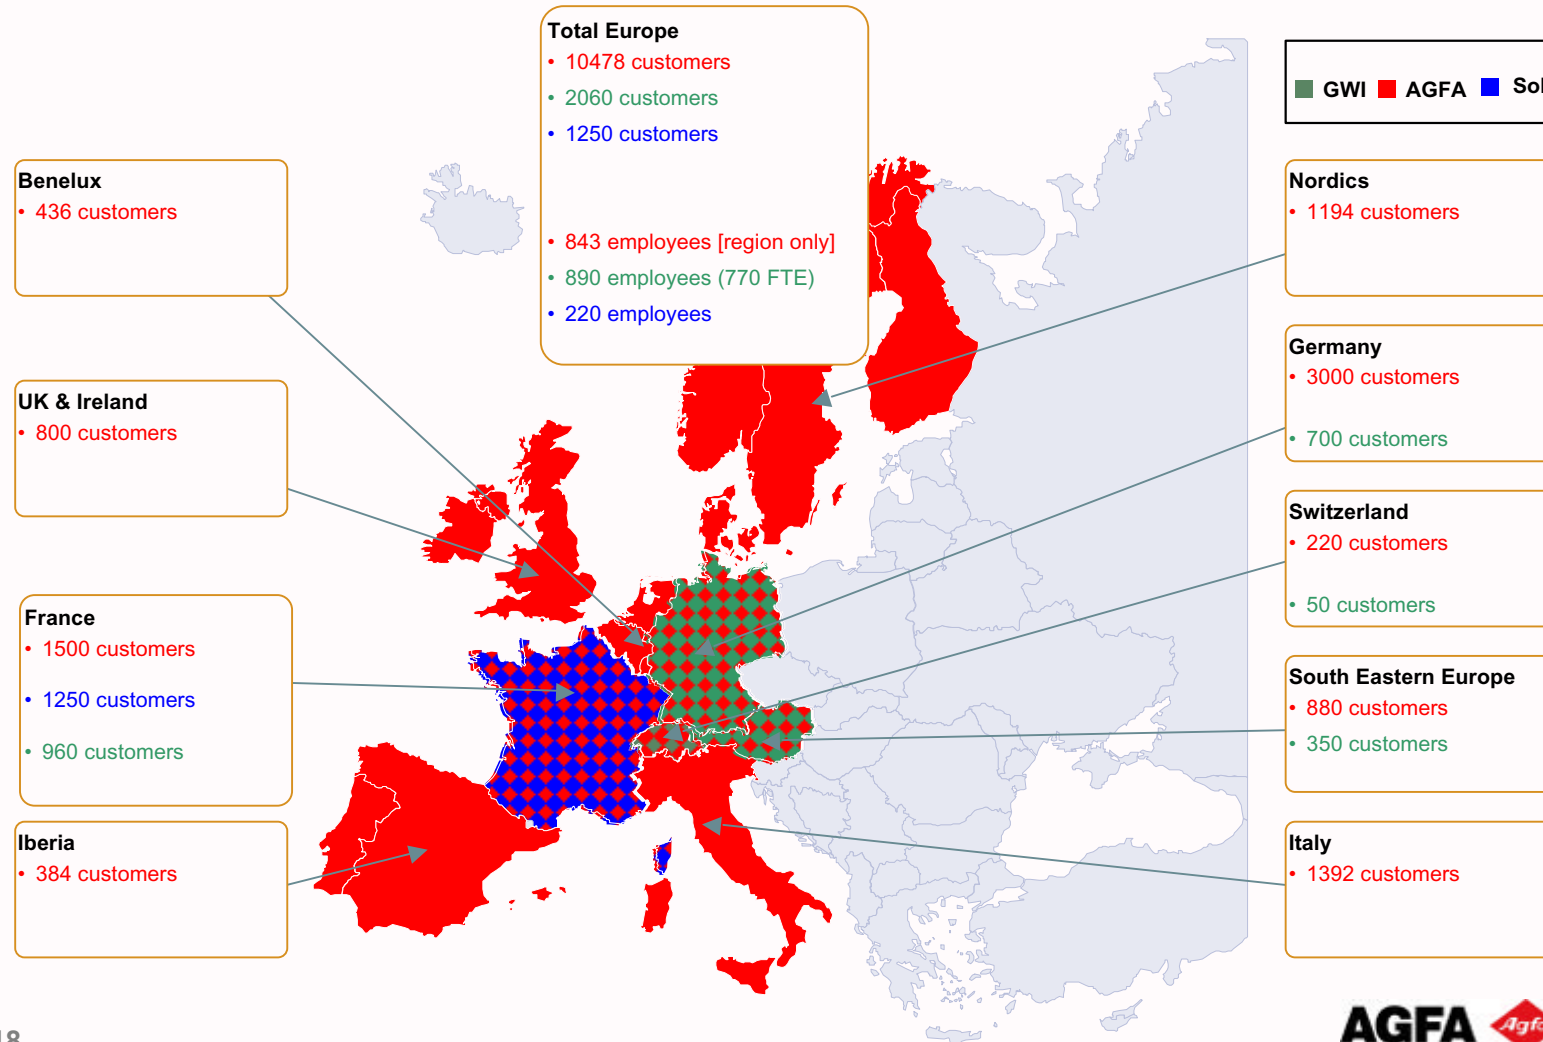

- Two complementary approaches to the market:
 - Initiatives from Enterprise Management
 - Initiatives from Departmental Management
- One broad yet unified portfolio that uniquely combines:
 - A best-in-class platform at enterprise level
 - Best-in-class platforms for key departments
- One proven methodology in project business:
 - Metrics that lead to predictable and repeatable results

The integration effort is focused

- Securing business in current markets
- Achieving synergies
 - Portfolio integration track
 - Fast market access
 - Preparing roll-out sequence beyond Germany and France

Agfa, GWI and SOL: Market access in Europe
