DIGITIX PACKAGE 4

Versatility plus top quality: discover our next-generation mammography and general radiography digital package

DX-M + DRYSTAR 5503 + 36 months of mammography and general use DRYSTAR film*

For a limited time, Agfa HealthCare is offering this unique package that combines our next-generation mammography and general radiography CR system with a top quality direct digital imager and 36 months of film. It's everything you need to discover digital mammography imaging.

This top-of-the-line mammography package includes our next-generation DX-M CR system, which not only offers you superb image quality, but also supports both standard phosphor plates and needle-based detectors and provides the convenience of a drop-and-go buffer. It comes with the DRYSTAR 5503: our high throughput, high resolution, multiple media size direct digital imager, which you can easily network for maximum productivity.

Plus, we're including 36 months of our DRYSTAR film. You can choose our high density, high contrast, dry processing mammography film, with optimum quality for digital mammography. Or our high throughput, dry processing, DRYSTAR film for general use*. With the 1 year warranty included, your destination is next generation digital mammography!

Don't miss out on this temporary opportunity: contact your local Agfa HealthCare distributor, who can explain all the advantages.

*(max 5400 m² general use film and/or 3000 m² Mammo film /contract)
