

Don't just get
on the path
to digital
imaging:
reach your
destination!

Use your existing X-ray equipment to discover portable digital imaging

DX-D 10G + DRYSTAR 5302 + 36 months of DRYSTAR film*

Want a solution that lets you go direct digital while maximizing your existing X-ray equipment investment? For a limited time, Agfa HealthCare is offering this unique package that lets you do just that.

The package includes our DR Retrofit solution using a cassette-size DX-D 10G detector with Gadolinium Oxy-Sulphide (GOS) conversion screen, combined with our dual media size DRYSTAR 5302 direct digital imager. Plus you get 36 months of our high throughput, dry processing, DRYSTAR film*. With the 1 year warranty included, you can use your existing X-ray equipment to start up the path to digital!

Don't miss out on this temporary opportunity: contact your local Agfa HealthCare distributor, who can explain all the advantages.

*(max. 5400 m² DRYSTAR film/contract)
