1 INTRODUCTION

1.1 Revision Record

Revision Number	Date	Reason for Change

1.2 Purpose and Intended Audience of this Document

This document is an HL7 Conformance Statement for the HL7 Services of IMPAX RIS 6.0.0.

The user of this document is involved with system integration and/or software design. We assume that the reader is familiar with the terminology and concepts that are used in the HL7 standard and the IHE Technical Framework.

Readers not familiar with HL7 terminology should first read the appropriate parts of the HL7 standard itself, prior to reading this conformance statement.

Although the use of this conformance statement in conjunction with the HL7 standard is intended to facilitate communication with IMPAX RIS 6.0.0, it is not sufficient to guarantee, by itself, the inter-operation of the connection between IMPAX RIS 6.0.0 and the 3rd party HL7-based system.

To help this integration validation we provide HL7 xml and pdf Conformance profiles bundled together in a zip file "001462_IMPAX RIS interface version 6.0.0 HL7 conformance profiles" on <http://www.agfahealthcare.com/hl7>.

The integration of any device into a system of interconnected devices goes beyond the scope of the HL7 standard and this conformance statement when *interoperability* is desired. The responsibility for analyzing the applications requirements and developing a solution that integrates the Agfa equipment with other vendors' systems is the user's responsibility and should not be underestimated.

1.3 Version overview

Table 1 provides an overview of the compatibility of RIS versions with Interface versions. This Conformance statement applies only for the interface version 6.0.0.

As of release 5.9 IMPAX RIS and Connectivity version have the same version number and are released together with a 1-on-1 compatibility constraint.

Table 1 RIS version overview
