

Step into digital imaging, with the

Easy Payment Scheme

Too often, high equipment and service costs plus a slow return on investment prevent healthcare providers from adopting advanced technologies such as digital imaging.

With Agfa's Easy Payment Scheme, healthcare facilities of any size and any imaging volume – high or low – can adopt a brand-new CR or DR system. So you, your staff and your patients get all the advantages of digital radiography, including higher quality images, increased productivity and a smoother, more efficient workflow.

Easy Payment Scheme

A full digital package

With the Easy Payment Scheme, you pay as you go, with a fixed down payment followed by equal, scheduled installments. Your up-front capital investment stays low, while your cost management is simple.¹

In return, you step into digital imaging with a full package that includes:

- A **digital radiography solution** of your choice:
 - Computed radiography (CR): **CR 10-X** or,
 - Direct radiography (DR): **DR Retrofit** with a DR 14e portable digital detector;
- **MUSICA workstation** for an intuitive and fast workflow;
- **MUSICA image processing software** for excellent digital image quality;
- A **Service Maintenance Agreement**;
- The DR Retrofit package also includes the **DR Detector Care Program**, protecting your portable detector from accidental damage.

You can further customize your Easy Payment Scheme with options including:

- **Cesium technology**, which offers the potential for substantial radiation dose reduction²;
- A **DRYSTAR 5302** tabletop digital imager.

¹ Paying the installments is easy, through the web-based interactive portal. Each payment ensures your use of the system through to the next installment date.

² Not available with CR 10-X

Contact your nearest Agfa office to find out more about how you can step into digital imaging, with the Easy Payment Scheme.
