

Enterprise Imaging Streaming Client

Networked for Connection:

Empower Your Reading from Anywhere – With Confidence

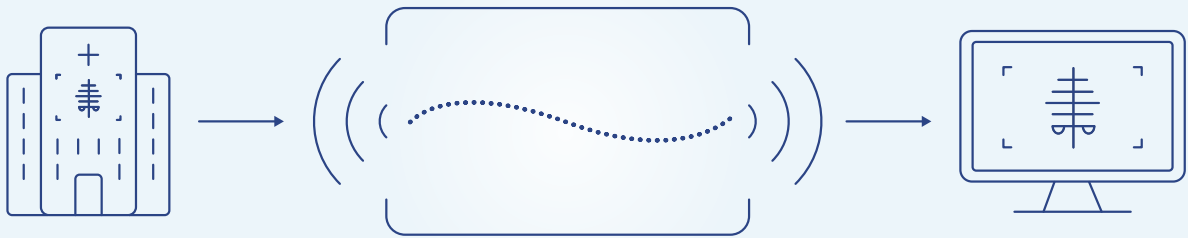

That's life in **flow**.

AGFA 
HealthCare

Enterprise Imaging Streaming Client

Eliminate barriers for radiologists,
extending diagnostic capabilities beyond the reading room.

Step into a new era of patient care where diagnostic speed meets precision.

With AGFA HealthCare Enterprise Imaging's innovative native Streaming technology, images are accessible blazing-fast, enabling the entire care team to collaborate effortlessly.

Unleash your potential as a radiologist

In the fast-paced world of imaging diagnostics, time, accuracy and accessibility are crucial.

AGFA HealthCare's Streaming Client for diagnostic imaging is designed to transform the way radiologists work and collaborate, by offering unprecedented freedom and limitless efficiency.

■ Effortless access

Break free from the constraints of traditional reading rooms.

Our streaming technology enables access to images in full diagnostic quality from any location, at any time.

Whether you're at the hospital, at home, or on the go, you can be productive and stay in the flow.

- **Blazing-fast technology for peak efficiency**

Experience blazing-fast image loading and live interaction.

With AGFA HealthCare's intelligent, streaming technology, even the largest exams are streamed effortlessly, allowing you to review, diagnose, and report without delays. Boost your productivity and experience excellent flexibility while reducing patient wait times with our efficient streaming solutions.

- **Enhanced care team synergy**

Collaborate with the entire care team across the enterprise and beyond in one unified environment that supports real-time chat and screen share sessions.

AGFA HealthCare's Streaming Client unifies the mostly separate clinical and diagnostic viewers into one true Universal Viewer. This enables faster communication to provide more efficient patient care.

- **Superior image quality**

Never compromise on quality. AGFA HealthCare's Streaming Technology delivers high-resolution images in lossless quality, preserving the intricate details required for a confident diagnosis. You gain the clarity you need for decision-making wherever you work.

- **Revolutionary and unique streaming technology**

AGFA HealthCare's unique native streaming technology features an intelligent pixel cache which streams pixels only once where needed in the image area.

This distinct approach significantly reduces data traffic and enhances system performance.

- **Robust security**

Protect patient data with our top-tier security protocols.

Our streaming technology complies with relevant regulations and standards so that sensitive PHI data remains safe and confidential. Focus on your work knowing that data security is our top priority.

- **Empower your Imaging Health Network™**

Elevate your diagnostic capabilities and embrace the future of medical diagnosis with tools designed to enhance your efficiency, collaboration, and accessibility.

Join the growing community that is uniting Imaging Health Records™ to enable Imaging Health Network™ with the shared goal of delivering an excellent patient experience.

Benefits for Health Professionals

- **Fast access to studies:** Seamlessly access imaging studies without the need to wait for downloads, allowing you to focus on patient care rather than technology.
- **High-quality imaging on a wide variety of compatible devices:** Experience the same high-performance imaging quality typically reserved for high-end clinical machines using a wide variety of compatible devices no matter what device you're using so that you can make confident decisions wherever you are.
- **Real-time collaboration:** Collaborate in real-time with other care team members, breaking down barriers and so that every decision is informed by the collective expertise of the team.
- **Confidence in image availability:** Trust that AGFA HealthCare Enterprise Imaging will consistently display images from affiliated storage locations within the Imaging Health Network™, so that you have the information you need.

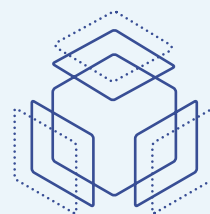

Benefits for IT Professionals

- Experience a true **zero-footprint** application – No downloads. No installs. No plugins.
- Significantly **reduce IT infrastructure** demands.
- Eliminate the need for expensive GPU servers or client-side GPUs, with **CPU-based rendering**.
- Dramatically **reduce IT costs** related to client management, installations, and downloads.
- Elevate IT efficiency by orchestrating centralized configuration for remote affiliated hospitals.
- Simplify application support and maintenance by managing a single unified viewer for both diagnostics and image distribution.
- Free up valuable time for developing **IT strategies** that align with business goals.

Speed counts, especially in the most critical situations.

Let's take the example of a child who is brought into a community hospital with a severe head injury.

With [AGFA HealthCare Enterprise Imaging](#) in place, the emergency physician can quickly consult a pediatric neurosurgeon working from home to review the image and provide vital information that helps the local team prepare for lifesaving surgery.
