# Enterprise Imaging Cloud

Scale as you go.
Experience carefree operations.

That's life in flow.

AGFA HealthCare

Enterprise Imaging Cloud

Scale as you go. Experience carefree operations.

Enterprise Imaging Cloud is AGFA HealthCare's SaaS solution
that provides seamless updates, effortless scalability, and enhanced security,
all while having better cost control, so you can focus on what truly matters – Patient Care.

Enterprise Imaging Cloud gives you all the benefits, capabilities and opportunities of the Enterprise Imaging platform, combined with the advantages of a hands-free fully managed SaaS solution on the Cloud.

Reduce complexity, workload and headaches with Enterprise Imaging Cloud

Unburden your IT operations and enjoy constantly up-to-date solution with Enterprise Imaging, natively deployed on the public cloud as a fully Managed Service.

Deployment, capacity management, performance monitoring, infrastructure security, and data protection - Enterprise Imaging Cloud covers it all.

With our carefree IT operations, you can focus your time and resources on what truly matters – fostering growth, enhancing clinical performance and improving clinician satisfaction, which ultimately leads to a better patient experience.

What cloud-native architecture brings with Enterprise Imaging Cloud:

Carefree Software Resiliency

by natively supported container orchestration, failover automation and load balancing.

- Seamless security patching
- High uptime upgrades/updates
- Effortless software expansions (blue-green deployments)
- Native self-healing mechanisms and container modularity grant fast recovery after system errors

Optimize IT Infrastructure Spend

by orchestrating the utilization of resources.

- Scale on-demand
- Unburden from storage renewal/expansion
- Drive performance-cost ratio down
- Optimized support for streaming technology

Predictability you can count on

In today's complex healthcare environment, no one likes uncertainty. From costs to availability, Enterprise Imaging Cloud makes sure you know exactly what you are getting. There are no 'surprise' expenses for migrations, software upgrades, or hardware refresh.

No questions about Service Level Agreements (SLAs). No uncertainty about who is responsible for what. Enterprise Imaging Cloud alleviates the uncertainty and provides the predictability you need to operate, focusing on growth, performance and satisfaction.

Always up-to-date

Keep your physicians, clinicians, and administrators current with our cloud-native technology and SaaS solution. Enterprise Imaging upgrades, updates and patches are included in Enterprise Imaging Cloud SaaS as a standard service. You never have to worry about falling behind or missing out on the latest advances and innovations.
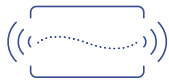

Enterprise Imaging, A complete Picture

In today's world, being connected regardless of location is a requirement. At AGFA HealthCare, we know geography can't constrain the delivery of patient care.

AGFA HealthCare Enterprise Imaging (EI) eliminates silos and enables affiliates and patient care teams from wherever they are in the world. Supported by our Streaming technology, Federation, Shared Workflow, and Orchestration, Enterprise Imaging Cloud brings multiple EI instances into one streamlined operational system and provides imaging without barriers.
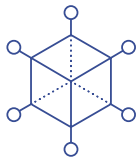

Effortlessly integrate with your IT ecosystem
Enterprise Imaging Cloud embeds the imaging history of your patients right into your Electronic Health Record (EHR),creating a complementary Imaging Health Record™ (IHR) for easy access to patient imaging data.

Reach peak efficiency with blazing-fast streaming technology
Experience near real-time image loading and live interaction. With AGFA HealthCare's intelligent streaming technology, even the largest exams are streamed effortlessly, allowing you to review, diagnose, and report without delays. Boost your productivity and experience excellent flexibility while reducing patient wait times with our efficient streaming solutions.

Unify affiliated imaging ecosystem into an Imaging Health Network™ (IHN)
Experience the power of a unified care community with the Imaging Health Network™, seamlessly connecting multiple collaborating health providers in a secure and integrated environment for a frictionless care pathway.

Optimize productivity and enhance the delivery of patient care with RUBEE® Orchestrator
Intelligent workflow orchestration with RUBEE® Orchestrator empowers clinicians to optimize their productivity and balance their workload, allowing them to dedicate more time for patient care.

RUBEE®
**ORCHESTRATOR**
Intelligent Workflow Orchestration

Enterprise Imaging Cloud brings it all but more. It goes one step further eliminating the need for extensive amounts of on-premises hardware, reducing physical space and operational costs and thus unburden from runtime risks. Beyond and above native infrastructure enables secure access from any location with an internet connection, enhancing further mobility and flexibility.

Tailored transformation

Your vision, our expertise.

With three distinct diagnostic packages and specialized VNA and Storage configurations, our Enterprise Imaging Cloud solution adapts seamlessly to your unique goals, strategy, and budget.

As your needs evolve, our cloud-native SaaS solution scale with you on-demand, supporting continuous support and growth.
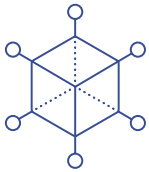

The Package of Choice!

Enterprise Imaging Cloud **STORAGE**	Enterprise Imaging Cloud **VNA**	Enterprise Imaging Cloud **DIAGNOSTIC ESSENTIALS**	Enterprise Imaging Cloud **DIAGNOSTIC STANDARD**	Enterprise Imaging Cloud **DIAGNOSTIC NETWORK**

First step towards hassle-free storage management	**Effortless treatment pathways with no vendor lock-in**	**One tool for seamless diagnostics and effortless collaboration**	**Maximize diagnostic efficiency along balanced workloads to support informed decisions**	**Streamline care delivery across enterprises for excellent efficiency**
Successively replace end-of-life on-premises storage with managed Cloud storage.	▪ Centralized image archiving ▪ Intelligent Information Lifecycle Management ▪ Multitude of service lines	▪ Universal diagnostic imaging viewer ▪ Core diagnostic tools ▪ Frictionless care team collaboration ▪ AI Ready	▪ Ground-breaking diagnostic functions ▪ Intelligent efficiency tools	▪ Diagnostic cross-enterprise care team collaboration ▪ PACS-Vendor neutral

for Radiology, Cardiology*, Mammography and Molecular Imaging.

*Note: Cardiology requires third party components

Unleash your growth

Our approach is simple: create a Cloud platform that is easy to adopt, manage, and work in – no matter how fast you grow over time. Offering unlimited user licenses, fast scalability, and easy affiliate integration, Enterprise Imaging Cloud lets you grow in all directions and increase your value to your enlarging organization. The EI Cloud platform adapts to changes in your data volumes, new imaging modalities, and the evolution and growth of your organization – without delays to increase your capacity and without pre-investing in infrastructure for future expansions.

Imaging Health Network™: connecting partners in healthcare

Enterprise Imaging Cloud facilitates the creation of an Imaging Health Network™ across all your affiliated partners creating a real-time image access network improving continuity of care as patients are moved between care providers. Images and clinical data are readily available to all members of the care team — no matter where they are located, including on compatible mobile devices. It is easier than ever to experience the efficiency of AGFA HealthCare streaming technology and provide seamless access to critical data – without boundaries.

Working together to realize your Enterprise Imaging strategy

AGFA HealthCare service organization is committed to your Enterprise Imaging Cloud experience from start to finish. Our dedicated team supports you with a fast, smooth implementation, followed by customer care, managed and monitoring services, ongoing opportunities to learn, and more.

By enabling your seamless transformation, we can make sure you realize the long-term value of your Enterprise Imaging strategy quickly and easily.

Enterprise Imaging Cloud offers to IT Leadership:

We empower you and your IT team to spend less time on low-impact tasks, and more time on achieving your growth objectives. AGFA HealthCare EI Cloud utilizing our cloud-native architecture enables true SaaS and boosts managed services while delivering capabilities and confidence. Experience a world where technology is not a bother, but a boost.

- Scale on-demand
- Continuous delivery and deployment
- SaaS enabled, fully managed services
- Efficient IT resources management
- Better operating cost control
- Reliability, availability, and resilience

- Managed security
- Maximized performance
- Peace of mind, quick, easy upgrades for always up-to-date software means no risk of falling behind
- Happy, productive clinicians

Are you looking for carefree operating lifecycles, reduced complexity, enhanced users' experience, and cost predictability?
