

# AGFA HealthCare Elefante® Web

Elevate clinical efficiency with next-generation RIS technology

That's life in **flow**.

**AGFA**   
HealthCare

# A customizable RIS solution that grows with your diagnostic needs

Efficiency blooms where processes and people can follow a natural and intuitive flow. With its responsive web design, Elefante® Web brings this flow to the radiology and other diagnostic imaging departments.

The patient-centered management lets you follow the patient through their radiology journey, from scheduling through report and image distribution. And it delivers a rich range of modular solutions, functions and advanced tools that streamline workflows for every user along the way.

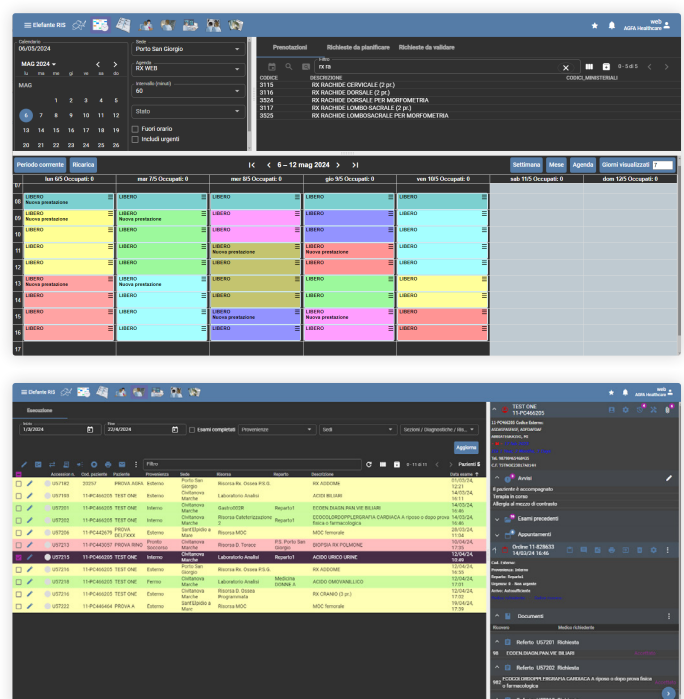

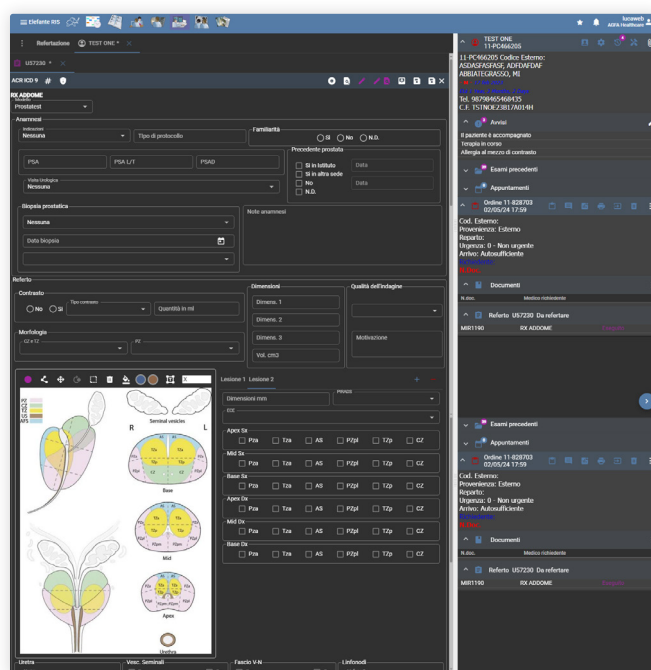

For over 100 years, AGFA HealthCare has been a respected leader in imaging innovations. Twenty years ago, our RIS Elefante.NET® revolutionized radiology workflows and information management in Italy, becoming the proven choice of hundreds of hospital sites across the country. Through our R&D center in Italy, we continue to uphold this legacy of pioneering excellence, with a RIS that harnesses the latest web technology to streamline, automate and optimize the radiology department's workflows, by delivering excellent functionality, reliability and service.

## Leveraging web-based technology

Elefante® Web uses new-generation, zero-footprint web technology that gives clinicians easy and secure access to centralized patient data and images from any location. All they need is a device, an internet connection and a common browser. The seamless and intuitive user interface streamlines workflow processes, enabling efficient data entry, image viewing and structured report generation.

## Patient-centric, user-focused

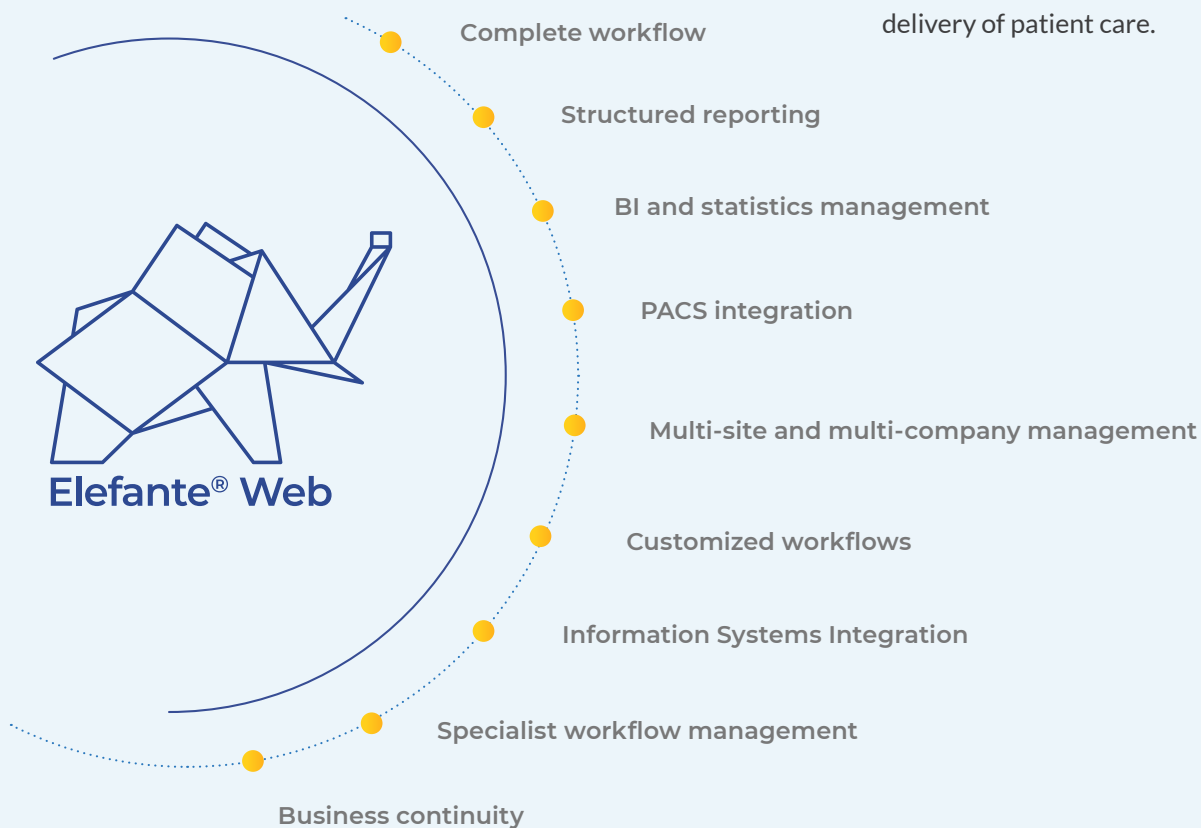

While the patient is at the center of the Elefante® Web workflow, the customizability and flexibility of the RIS gives users the information they need in the most complete, yet simple, way. Every staff member, regardless of their level of experience or familiarity, finds it intuitive to use – reducing training needs and enabling each person to work at the top of their craft.

## Seamless harmony: integrating Elefante® Web with your existing information systems

AGFA HealthCare is a leading provider of integrated imaging IT solutions, and that expertise is fully realized in Elefante® Web.

- Backend integrations based on a full range of national and international standards (HL7, IHE,...) empower frictionless data transfer across systems, departments and workflows.
- Integration with healthcare information systems such as the electronic health record (EHR) and hospital information system (HIS) contribute to a more comprehensive and cohesive patient care environment.
- Vendor-neutral, Elefante integrates with AGFA HealthCare Enterprise Imaging and 3rd-party PACS. Together, they create a smooth, fast and efficient radiology workflow that enhances the overall performance of the radiology department and improves the delivery of patient care.

## Scalable for every size of hospital and network

Elefante® Web has proven itself in healthcare facilities of all sizes: from private diagnostic centers and small public clinics, to local health authorities and regional public health networks. Elefante's rich functionality, and flexibility for different levels of integration, workflow complexity, hierarchies and security needs, allows it to scale and to match the requirements of the radiology provider. And the synchronization engine enables Elefante® Web to continue to function optimally across a geographically dispersed network even when connectivity is temporarily down.

## Beyond Radiology: Elefante® Web for multiple departments

The benefits of Elefante® Web can be extended beyond the Radiology environment, to enable administrative and data management for multiple clinical departments within the hospital, such as nuclear medicine and endoscopy. Building on the strength of the Elefante® Web platform, each department has its own similar but distinct work processes and tools.

# Your trusted partner for proven and responsive service

AGFA HealthCare is a proven partner for our customers in Italy and beyond, offering a renowned level of service. We support you with a smooth implementation, and ongoing customer care, consultancy, advice and opportunities to learn.

### For Clinical Professionals

- Web-based access to data and images, from anywhere
- Fast, flexible tools and customizable workflows
- Intuitive user interface that requires minimal training
- Seamless, vendor-neutral integration with other systems, to enable a more cohesive and comprehensive patient care environment
- Features that enhance collaboration and secure shared access to patient data
- High level of reliability

### For IT Professionals

- A web-based system that is easier to implement, upgrade, maintain and secure compared to a fat client system, with lower hardware infrastructure costs and greater reliability
- A key element in your journey to a 'cloud-ready' infrastructure
- A robust and dynamic system that can connect to different existing systems
- Scalable and suitable for both smaller and larger hospitals, clinics and networks
- Secure sharing of information inside the hospital and between facilities
- Rich range of modules that enable you to support the various needs of the radiology and other departments
- High availability and disaster recovery
- Easy and flexible migration from Elefante.Net to Elefante® Web
