Arigi UV F2 ink set

High-performance ink set for multi-pass printing. Ink set targeted for printing on roll-to-roll or hybrid wide-format UV print systems.

Overview
The Arigi UV ink range of high-performance inks is targeted at wide-format printing.

Arigi UV F2 is a UV-curable inkjet ink set suitable for printing on roll-to-roll and hybrid wide-format UV-printers equipped with bulb or LED curing and based on piezo printheads demanding a viscosity of 8 to 14 mPas at jetting temperature.

The 7-color ink set (CMYKLCLMW) is designed for good flexibility of the prints.

Key benefits
- Good flexibility of the prints
- Curing with LED or bulb systems
- Wide color gamut combined with low ink consumption
- Excellent jetting reliability (in many print modes)

Field of use
Arigi UV F2 ink set is suitable for multi-pass printing with bulb or LED curing and equipped with piezo printheads with requirement for standard inkjet viscosity, including printheads from Konica Minolta, Xaar, Ricoh, Toshiba TEC, Fujifilm Dimatix, Seiko.
**Functional specifications**

- Multi-pass printing ink set
- Ink set CMYKcLMW
- Excellent image quality
- Wide color gamut combined with low ink consumption
- White ink with high opacity and flexibility
- High flexibility of the prints on flexible media
- Excellent jetting performance,
  - including print modes based on multiple drops (3dpd)
  - including using small drop sizes
- Curing with bulbs (various types of mercury bulbs) or UV LEDs (395 nm)
- Intended primarily for printing on flexible media
