# Agfa Graphics
# Global Safety, Health and Environment Policy

*Agfa Graphics is a world leader in prepress solutions for the printing and publishing industries. It provides commercial, newspaper and packaging printers with the most extensive range of prepress and inkjet printing solutions. Agfa Graphics is committed to be first in class for Safety, Health and Environment.*

## *"Respect for our shareholders, customers, neighbours and employees is respect for Safety, Health and Environment"*

One of Agfa Graphics' Core Values and Believes is that comprehensive environmental protection and maximum health and safety are given the same priority as high product quality and commercial efficiency.

Agfa Graphics will not restrict its products and activities to merely complying with legal requirements relative to the environment, health and safety. On its own initiative, Agfa Graphics will also take further steps based on its proper sense of responsibility.

Agfa Graphics is committed to continuously improve its SHE performance whilst lowering our environmental impact in a total life cycle approach of our products.

## *"Agfa Graphics accepts full responsibility for its products"*

Product Stewardship is Agfa Graphics' commitment. 'Responsible Care' for our products is brought into practice by critically examining the environmental, health and safety issues throughout each stage of the product's life cycle.

Agfa Graphics' products are designed, developed and manufactured so that the production process, the transportation, the storage and the use of products, as well as the waste treatment at the end of the life cycle have minimal impact upon the environment. At least all Agfa products are designed and manufactured to meet all World Wide Regulatory requirements which include Product Safety, EMC, Packaging, and Environmental requirements.

Agfa Graphics will advise its customers, its employees and the authorities with an evaluation of its products and manufacturing processes, in all matters pertaining to health, safety and environment.

Agfa Graphics provides safety, health and environment information regarding its products.
- Safety Data Sheets (SDS) summarizes data about the composition of chemical substances and preparations and the relevant health, safety and environmental information.
- Article Information Sheets (AIS) contain similar data about Articles like Film, Printing Plates etceteras.
- Equipment Information Sheets (EIS) contain relevant health, safety and environmental data about equipment.

- Recycling Passes (RP) give information to customers and specialized waste collectors about hazardous components and valuable materials in end-of-life equipment.

*"Agfa Graphics strives to continuously increase its safety, health and environment performance in manufacturing sites"*

Printing plates, chemicals and equipment are manufactured in several production sites all over the world.

Agfa Graphics is committed to operate these manufacturing sites in healthy and safe conditions for our employees, visitors and neighbours. Environmental impacts are continuously reduced according the BATNEEC principles.

Corporate targets will mainly focus on:
- personal safety
- waste prevention and waste treatment according the ladder of Lansink
- emissions reduction for green house gasses and for volatile organic compounds (VOC)
- management systems and their performance

Based on the specific local situation, Agfa Graphics' manufacturing sites are motivated to establish local additional goals for SHE.

*"Agfa Graphics is committed to continuously improve SHE performance"*

As a driver for continuous improvement, Agfa Graphics management evaluates on a regular basis the SHE performance. The results of these management reviews are published in the Agfa Graphics Sustainability Report.
